Press Release

Arctic Fan 8, 9, 12 PWM

Low noise optimized PC-case fan with PST (PWM Sharing Technology) of ARCTIC COOLING

Pfäffikon/ Switzerland, 10.11.2006. The Swiss fan manufacturer ARCTIC COOLING launches a new line of Arctic Fans PWM with PST. Thanks to the patented PST (**PWM Sharing Technology**) the speed of up to 5 fans can be simply regulated via the BIOS. This enables the entire cooling to be centrally controlled. An integrated motorized PWM amplifier enables this function. The fan blades were optimized to achieve larger airflow and higher static pressure. Additionally vibrations generated by the rotating fan are absorbed by a unique patented vibration dampener, which results in extremely low noise levels. The Arctic Fan PWM series is both RoHS and WEEE conform. As with all ARCTIC COOLING products these case fans assure a long lifetime and have a 6 year warranty.

All three models will be available by mid of December 2006. The MSRP is only USD 6.99 (80 mm), USD 7.99 (90 mm) and USD 10.99 (120 mm).

For evaluation sample please send us your request.
